

Step 03 — Tenants + Super Admin (manual test guide)

Goal: Confirm Super Admin bootstrap, company (tenant) create/list/status, and company-admin creation. Non-Super Admin callers must be rejected.

Maps to: Phase 1 — Foundation
Do not start Step 04 until every required item passes.

Artifacts:

- Markdown: docs/manual-test-guides/step-03-tenants.md
- PDF: docs/manual-test-guides/step-03-tenants.pdf

Prerequisites

- ☐ Step 01 and Step 02 already passing
- ☐ PostgreSQL running; fms_dev exists
- ☐ server/.env.local includes DATABASE_URL , JWT_SECRET , and Super Admin bootstrap keys (see .env.local.example):
 - SUPER_ADMIN_EMAIL (example: superadmin@fms.local)
 - SUPER_ADMIN_PASSWORD (min 8 chars; example: password123)
 - SUPER_ADMIN_NAME (optional)
- ☐ Migration applied: npm run prisma:migrate (includes step03_tenants)

Setup commands

Server:

```
cd finance-management/server
npm install
npx prisma generate
npm run prisma:migrate
npm run dev
```

Expect a log line: Created Super Admin superadmin@fms.local (only the first time).

Client (new terminal):

```
cd finance-management/client
cp .env.example .env # if needed; leave VITE_API_URL empty
npm install
npm run dev
```

Checklist

A. Super Admin bootstrap + session

#	Test	Expected	Pass?
A1	Restart API with bootstrap env set	Console shows created or already-present Super Admin (no password printed)	[]

A2	POST /api/v1/auth/login as Super Admin	HTTP 200, role: SUPER_ADMIN, tenantId: null, cookie set	[]
A3	UI: sign in at /login with Super Admin	Home shows role SUPER_ADMIN and Manage companies	[]
A4	Restart API again	Does not recreate the user or reset the password	[]

Example login:

```
curl -i -c cookies.txt -X POST http://localhost:4000/api/v1/auth/login \
-H "Content-Type: application/json" \
-d "{\"email\":\"superadmin@fms.local\",\"password\":\"password123\"}"
```

B. Companies (tenants) API

Use the Super Admin cookie from A2 (-b cookies.txt).

#	Test	Expected	Pass?
B1	GET /api/v1/tenants	HTTP 200, tenants array	[]
B2	POST /api/v1/tenants with { "name": "Acme Ltd" }	HTTP 201, company with generated slug (e.g. acme-ltd), status: ACTIVE	[]
B3	POST /api/v1/tenants/:id/admins with email, password (≥8), optional name	HTTP 201, user role: COMPANY_ADMIN, tenantId matches company	[]
B4	PATCH /api/v1/tenants/:id with { "status": "INACTIVE" }	HTTP 200, status: INACTIVE	[]
B5	Login as the company admin while company is inactive	HTTP 403 TENANT_INACTIVE / "This company is inactive"	[]
B6	PATCH company back to ACTIVE, then login as company admin	HTTP 200; /api/v1/auth/me includes tenant.name	[]

Create company:

```
curl -i -b cookies.txt -X POST http://localhost:4000/api/v1/tenants \
-H "Content-Type: application/json" \
-d "{\"name\":\"Acme Ltd\"}"
```

C. Authorization negatives

#	Test	Expected	Pass?
C1	GET /api/v1/tenants without cookie	HTTP 401	[]
C2	Login as a normal (self-registered) user, then GET /api/v1/tenants	HTTP 403 FORBIDDEN	[]
C3	Same normal user opens http://localhost:5173/tenants	Redirected home (no company manager)	[]
C4	Create company admin with an email that already exists	HTTP 409 "Email is already registered"	[]

D. Super Admin UI

#	Test	Expected	Pass?
---	------	----------	-------

D1	Open http://localhost:5173/tenants as Super Admin	Companies page loads	[]
D2	Create a company from the form	New card appears with slug	[]
D3	Add a company admin from the card	Email listed under Company admins	[]
D4	Toggle Active / Inactive	Status text updates	[]

E. Coding rules smoke

#	Test	Expected	Pass?
E1	Controllers call services	tenantController → tenantService (no Prisma in routes)	[]
E2	Super Admin guard	requireSuperAdmin ON /api/v1/tenants	[]
E3	Users have tenant_id	Prisma User.tenantId; Super Admin stays null	[]

Pass criteria for Step 03

- ☐ A1–A4 pass
- ☐ B1–B6 pass
- ☐ C1–C4 pass
- ☐ D1–D4 pass
- ☐ E1–E3 pass

When all required items pass: mark Notion **Step 03: Tenants...** and **Implement Super Admin...** Done, then start **Step 04 — RBAC**.

Notes / failures

Item	What failed	Fix applied
