

Step 08 — Expense core (manual test guide)

Goal: Confirm expense CRUD on the shared `financial_transactions` model (date + amount + custom field values), with soft delete, audit, and role-aware UI.

Maps to: Phase 3 — Monthly Expenses (core only; categories/vendors are Step 09)

Do not start Step 09 until every required item passes.

Artifacts:

- Markdown: `docs/manual-test-guides/step-08-expense-core.md`
- PDF: `docs/manual-test-guides/step-08-expense-core.pdf`
- Postman: `docs/postman/FMS-API.postman_collection.json` (Expenses folder)
- Depends on Steps 06–07 (`/api/v1/fields` + field builder)

Prerequisites

- ☐ Steps 01–07 already passing
- ☐ PostgreSQL running; migrations applied (includes `step08_expense_core`)
- ☐ Super Admin bootstrap env set in `server/.env.local`
- ☐ At least one company with a **company admin** (Step 03)
- ☐ A self-registered **normal user** in that company (or create one via register + Super Admin assigning tenant — if the normal user has no tenant, use a company member with `NORMAL_USER`)
- ☐ Optional: an enabled Expense custom field (text or dropdown) from Step 07
- ☐ Server + client dev servers running

Setup commands

Server:

```
cd finance-management/server
npm install
npx prisma generate
npm run prisma:migrate
npm run dev
```

Client:

```
cd finance-management/client
npm install
npm run dev
```

Open <http://localhost:5173> and sign in as a **company admin**.

Checklist

A. Route access

#	Test	Expected	Pass?
A1	Home as company admin	Shows Expenses link	[]
A2	Open /expenses as company admin	Page loads; add form visible	[]
A3	Open /expenses as normal user (same company)	List loads; no add/edit/delete	[]
A4	Open /expenses as Super Admin	Redirects to home (no tenant)	[]
A5	Open /expenses signed out	Redirects to login	[]

B. Create + list (UI)

#	Test	Expected	Pass?
B1	Month/year picker defaults to current month	List filtered to that month	[]
B2	Add expense: date in current month, amount 12.50, optional notes	Row appears with date and 12.50	[]
B3	Custom fields from Step 07 render under the form	Values saved and shown as table columns	[]
B4	Required custom field left empty	Error shown; expense not created	[]
B5	Switch month in the picker	List shows only that month's dates	[]

C. Update + soft delete (UI)

#	Test	Expected	Pass?
C1	Edit amount/notes	Row updates; form can be cancelled	[]
C2	Delete (confirm)	Row leaves the list	[]
C3	Recreate is a new record	Deleted row does not come back	[]

D. API (Postman or curl as company admin)

Login as company admin first (Auth → Login (company admin)).

#	Test	Expected	Pass?
D1	POST /api/v1/expenses { "occurredOn": "2026-08-15", "amount": "20.00" }	HTTP 201; expense.amount is "20.00"; type is EXPENSE	[]
D2	GET /api/v1/expenses?year=2026&month=8	Includes the new row; fields array present	[]
D3	PATCH /api/v1/expenses/:id { "amount": "25.50" }	HTTP 200; amount "25.50"	[]
D4	DELETE /api/v1/expenses/:id then GET by id	HTTP 200 then HTTP 404 EXPENSE_NOT_FOUND	[]

D5	GET list after delete	Deleted id is absent	[]
D6	Audit: GET /api/v1/audit? entityType=FinancialTransaction	CREATE / UPDATE / DELETE entries	[]

Example:

```
curl -s -b cookies.txt -H "Content-Type: application/json" \
  -d '{"occurredOn":"2026-08-15","amount":"20.00","notes":"Taxi"}' \
  http://localhost:4000/api/v1/expenses | jq
```

E. Negative cases

#	Test	Expected	Pass?
E1	POST amount 0 or -1	HTTP 400 validation error	[]
E2	POST as normal user	HTTP 403 FORBIDDEN	[]
E3	GET /api/v1/expenses as Super Admin	HTTP 403 TENANT_REQUIRED	[]
E4	GET /api/v1/expenses without cookie	HTTP 401	[]
E5	GET another tenant's expense id (if two companies exist)	HTTP 404	[]

Pass criteria for Step 08

- ☐ All **required** checklist items above pass
- ☐ Amounts are stored/returned as decimal strings (not JS floats)
- ☐ Delete is soft (deleted_at); row disappears from list/get
- ☐ Custom field values persist on the expense (JSONB)
- ☐ Company admin can write; normal user is read-only; Super Admin cannot access

When all required items pass: mark related Notion tasks Done, then start **Step 09 — Expense support data**.

Quick manual flow

1. Login as company admin
2. Home → **Expenses**
3. Add an expense for this month (amount + optional custom field)
4. Edit it, then soft-delete it
5. Confirm it is gone from the list and GET-by-id is 404
6. Check audit trail for `FinancialTransaction`
7. Login as normal user: list visible, no write controls
