

Step 11 — Thin dashboard (manual test guide)

Goal: Confirm KPI cards, 2–3 expense charts, and basic filters (presets + custom range + category/department/vendor) for company admins and normal users.

Maps to: Phase 4 — Dashboard (MVP / thin)

Do not start Step 12 until every required item passes.

Artifacts:

- Markdown: docs/manual-test-guides/step-11-thin-dashboard.md
- PDF: docs/manual-test-guides/step-11-thin-dashboard.pdf
- Postman: docs/postman/FMS-API.postman_collection.json (Dashboard folder)
- Depends on Steps 08–10 (expenses + support data)

Prerequisites

- ☐ Steps 01–10 already passing (or Step 10 checklist completed)
- ☐ PostgreSQL running; migrations applied
- ☐ Company admin + normal user in the same company
- ☐ Several expenses in the current month with categories / vendors (and preferably different dates)
- ☐ Server + client dev servers running (recharts installed on client)

Setup commands

Server:

```
cd finance-management/server
npm install
npx prisma generate
npm run prisma:migrate
npm run dev
```

Client:

```
cd finance-management/client
npm install
npm run dev
```

Open <http://localhost:5173> and sign in as a **company admin**.

Checklist

A. Route access

#	Test	Expected	Pass?
A1	Home as company admin	Shows Dashboard link	[]

A2	Open /dashboard as company admin	Page loads; filters + KPI cards + charts	[]
A3	Open /dashboard as normal user (same company)	Same read-only dashboard (no expense edit UI here)	[]
A4	Open /dashboard as Super Admin	Redirects to home (no tenant)	[]
A5	Open /dashboard signed out	Redirects to login	[]

B. KPI cards (UI)

#	Test	Expected	Pass?
B1	Default This month	Total expense matches month's expenses; count > 0 if data exists	[]
B2	Total income	Shows \$0.00 (income module is Step 14)	[]
B3	Net balance	Equals income – expense (negative when only expenses)	[]
B4	Avg daily expense	Total expense ÷ inclusive days in range	[]
B5	Highest expense	Shows largest amount in range (or — if empty)	[]

C. Charts + filters (UI)

#	Test	Expected	Pass?
C1	Charts present	Expense by day (line), by category (doughnut), by vendor (bar)	[]
C2	Switch to Last month	KPIs/charts refresh for last month	[]
C3	Switch to Custom range with from/to	Data limited to that range	[]
C4	Filter by category	Totals and charts shrink to that category	[]
C5	Filter by vendor	Same for vendor	[]
C6	Empty range (future dates)	KPIs zero / — ; charts show empty state	[]

D. API (Postman or curl)

#	Test	Expected	Pass?
D1	GET /api/v1/dashboard/summary?preset=this_month as company admin	200; ok, kpis, charts, filters	[]
D2	Same as normal user	200	[]
D3	preset=custom without from/to	400	[]
D4	Super Admin (no tenant)	403 / tenant required	[]
D5	Soft-deleted expenses	Not included in totals	[]

E. Negative / security

#	Test	Expected	Pass?
E1	Tenant A admin cannot see Tenant B totals	Only own-tenant aggregation	[]
E2	No write endpoints on dashboard	Only GET /summary	[]

Pass criteria

All **required** rows (A–E) pass. Soft-deleted expenses stay out of KPIs. Normal users can view; Super Admin cannot without a tenant.

When all required items pass: mark related Notion tasks Done (FMS-30, FMS-31, and thin-slice of FMS-32 / FMS-33 / FMS-36 / FMS-37), then start **Step 12 — Full dashboard**.
