

Step 19 — User theme preference (manual test guide)

Goal: Confirm per-user light/dark theme preference is stored on the `users` table, exposed via `/api/v1/auth/me` , and updatable with `PATCH /api/v1/auth/me/theme` .

Maps to: Phase 2 — UX polish

Do not start Step 20 until every required item passes.

Artifacts:

- Markdown: `docs/manual-test-guides/step-19-user-theme.md`
- PDF: `docs/manual-test-guides/step-19-user-theme.pdf`
- Postman: `docs/postman/FMS-API.postman_collection.json` (Auth → Update theme)

Prerequisites

- ☐ Steps 01–17 already passing
- ☐ Migration applied: `step17_user_theme` (`theme_preference` column on `users`)
- ☐ Server and client running locally

Setup commands

```
cd finance-management/server
npx prisma generate
npm run prisma:migrate
npm run dev
```

```
cd finance-management/client
npm run dev
```

Checklist

A. API

#	Test	Expected	Pass?
A1	Login, then GET <code>/api/v1/auth/me</code>	<code>data.user.themePreference</code> is LIGHT for existing users	☐
A2	PATCH <code>/api/v1/auth/me/theme</code> with { "themePreference": "DARK" }	HTTP 200; response user has <code>themePreference: "DARK"</code>	☐
A3	GET <code>/api/v1/auth/me</code> again	Still DARK	☐
A4	PATCH with invalid value (e.g. "blue")	HTTP 400 validation error	☐
A5	PATCH without session cookie	HTTP 401	☐

B. UI

#	Test	Expected	Pass?
B1	Log in and open any app page	Default light shell	[]
B2	Click Theme in the sidebar footer	UI switches to dark mode; label shows Dark	[]
B3	Refresh the page	Dark mode persists for the same user	[]
B4	Log out and log in as a different user	That user's saved preference applies (default light if never changed)	[]
B5	Toggle back to light	UI returns to light mode and persists after refresh	[]

C. Database

#	Test	Expected	Pass?
C1	Inspect <code>users.theme_preference</code> for your test user	Value matches the UI (LIGHT or DARK)	[]

Notes

- Theme is stored on the `users` row in the main FMS PostgreSQL database (not a separate database).
- Login/register screens keep their existing styling; theme applies inside the authenticated app shell.
